Information for contributors

Partners are invited to contribute to the interactive poster presentation and to selected oral presentation of the Helsinki Forum whose theme is "Inspiring young people to study physics". While all subjects covered by Work Group 1 are eligible for presentation, for some specific topics a small number of contributions will be selected for oral presentation.

General topics include national, regional and local actions or projects to promote or inspire young people, physics competitions, surveys, outreach activities, science museums and centres, popularization and outreach of research: initiatives done and evidence of their role in inspiring young people to study physics....

Contributions on the following **specific topics** may be offered oral presentation:

◆ **Science in school:** physics teaching/learning in school at all levels, new strategies and methods, evidence of student engagement, role of the school curriculum (modern physics, experiments, current issues, formalism...) in inspiring the young.

◆ **School-university cooperation:** all kinds of cooperation established between schools and universities and their impact.

◆ **Physics and the media:** all aspects of the presentation of physics in the media (journalism, radio, television, web...) and its influence on the general public and its role in inspiring the young to study physics.

Please check poster or oral as appropriate for the contribution you are offering (see below)

Size of the poster : A0 preferred (841mm × 1189 mm)

**Send this form (attachement to email) to HOPE-Network@upmc.fr
before may 1st**
